N=1005 Margin of error +/- 3.2 percentage points

203. What if the government wanted to mandate an experimental vaccine, which had not been subjected to standard safety testing, for mass deployment during a public health emergency. Which of the following statements most closely matches your view? A: The government should mandate an experimental vaccine during a public health emergency to prevent the spread of disease. B: The government should not mandate an experimental vaccine as that would require forcing members of the population to take an experimental medical product against their will.

203. What if the government wanted to mandate an experimental vaccine, which had not been subjected to standard safety testing, for mass deployment during a public health emergency. Which of the following statements most closely matches your view? A: The government should mandate an experimental vaccine during a public health emergency to prevent the spread of disease. B: The government should not mandate an experimental vaccine as that would require forcing members of the population to take an experimental medical product against their will.

204. Which of the following statements about vaccines and product liability most closely matches your view? A: Excessive lawsuits from those harmed by vaccines can stifle further vaccine innovation. Therefore, Congress was right to enact a no-fault compensation program as an alternative to lawsuits for those injured by vaccines. B: Anyone harmed by a vaccine should be able to file a lawsuit against the manufacturer, as is the case for almost all other products and services.
