MICHAEL RAWLUK
18735 W 59TH DR
GOLDEN CO 80403

FOIA# 2023-03524CA

Dear Mr. Rawluk:

This is in response to your request of January 25, 2023, which arrived in this office on January 30, 2023, under the terms of the Freedom of Information Act (FOIA), 5 U.S.C. § 552, requesting the statistics on a year by year basis from 2012 to present and on a monthly basis from 2019 to present for all pilots who took a First Class Medical Exam and who had Guillian Barre syndrome, and if they were granted or denied a First Class Medical Certificate based on their Guillian Barre condition.

The enclosed tables contain the information requested on GBS. These are cases of GBS that were reported during the specified time period. This however does not mean that is when the airmen had GBS. Thus on the table, the issued certifications have been broken down into 2 columns: applicable to current certification and not applicable to current certification. If the airmen had GBS many years ago, then it was deemed not applicable to current certification as it was not weighed in on the current application decision even though it was noted on that exam that they had had GBS in the past. Data for 2022 is subject to change as certificates are still processing.

You owe fees in the amount of \$213.00 for the processing of this request, an invoice and payment instructions will be enclosed with this letter.

You have the right to seek dispute resolution from the following:

FAA FOIA Public Liaison via phone (202)267-7799, email 7-AWA-ARC-FOIA@faa.gov (Subject Line: FOIA Public Liaison); or

Government Information Services (<https://ogis.archives.gov>) via phone (202)741-5770, toll-free 1-877-684-6448, fax (202)741-5769 or email ogis@nara.gov.

If we can be of further service, please let us know.

Sincerely,

David M. O'Brien, M.D., M.P.H.
Manager, Aerospace Medical Certification Division
Civil Aerospace Medical Institute
