

nothing. As a physician, I have never heard of an illness like this. It is unbearable. I am barely surviving. I have contemplated [REDACTED]. There are 1000's others like me. No one in this country knows what has happened to us. We have reached out to every expert across the country including the CDC and the NIH. It is time that we get answers. It is ridiculous and criminal that no one is talking about these reactions or trying to help us. It is time that we get the help that we need. Please. Stop gaslighting us and help us. We are innocent Americans who took the vaccine willingly with no informed consent and our lives have been taken from us. You have abandoned us. Please. It is your duty to acknowledge and help us. We are tired of writing these letters to you and pleading for help. Do your job and help us. We beg of you.

6-30-21 email from Janet Woodcock MD at FDA

I am so very sorry to hear of your condition. I can understand how it can't be diagnosed and of course that creates issues in reporting such events.

When did this happen with respect to the vaccine? 1st or 2nd dose? Janet Woodcock M.D.

Subject: [EXTERNAL] Severe neurological reac>on to the
Pfizer covid vaccine

6-30-21 email to Janet Woodcock MD at FDA. She did not
respond to this email.Re: [EXTERNAL] Severe neurological
reaction to the Pfizer covid vaccine

To: [Woodcock, Janet](#)

We have communicated before and I have given you a lot of
information. You told me that my symptoms don't fit into a
category that you were interested in and I told you that you should
become interested in these reactions because there are
thousands who have had similar reactions and are unable to get
anyone to help them. I know others have written to you with
similar issues.

I will attach my history below.

I am part of a group of 125 people who have had very similar
reactions and have struggled to get medical care as the medical
community knows nothing. They have been kept in the dark. It is
time to discuss these reactions publicly so that we can get
validation and help. There are institutions who are very aware of
these reactions including the Mayo Clinic, Yale and the NIH. We
will not allow these neurological reactions to stay secret anymore.
We are intent on getting the word out so that we can get help. It is
time that the FDA and the drug companies acknowledge what has
happened to many people. There are young vibrant people who
have lost use of their legs. There are children who have been
affected terribly. There are those like me who are incapacitated

with severe painful paresthesias. You cannot ignore it any longer. Why do we have to fight for acknowledgment and medical help?

We have been injured and should be helped. You should be running to us to find out what has happened and how to help. If this happened to you, I'm sure you would feel the same as we do. This is just wrong and it must change.

Sincerely, Danice Hertz MD

Covid vaccine reaction summary 6/30/21

I am a 64-year-old retired gastroenterologist in Los Angeles. I was in good health, feeling fine. I was on metoprolol and Irbesartan for mild HTN and palpitations. I received the Pfizer Covid Vaccine on 12/23/20 (lot number EK5730) and 30 minutes later developed intense burning in my face and had a pre-syncopal event. The paramedics found my bp to be very high at 175/126. Since that time, I have had persistent severe paresthesias (burning, tingling, numbness) in my face, LP tongue, arms and legs as
